How Buyers Should Use This

Use this kit as a launch-planning file before building a full KDP book, printable, or digital-product listing. The report helps turn one rough niche idea into a go/no-go snapshot across buyer intent, giftability, competition clarity, production simplicity, and evergreen demand.

This package is a planning aid. It does not guarantee Amazon ranking, sales, royalties, reviews, ad performance, or marketplace approval.

Recommended Workflow

1. Read the executive snapshot.
2. Review the score breakdown and weakest dimension.
3. Pick one title angle and one buyer promise to test.
4. Build a small sample or preview, not a full product line.
5. Share the sample organically with tracking.
6. Improve, clone, or stop based on clicks, questions, and sales signals.

Delivery Notes

This package can be delivered as the ZIP file `kdp-launch-report-kit.zip`. If using PayPal, Payhip, Gumroad, or Drive delivery, upload the ZIP and provide it only after payment.

Do not publish the ZIP under the public website directory unless the product is intended to be free.
